The ERIE MG-11C brings superior performance to the toughest concrete construction projects.

- The unitized mobile configuration combines rapid mobilization with high plant output.
- The open access to plant operation provides for quick monitoring of all plant functions.
- Project supervisors find the MG-11C ideally suited to reliably meet production deadlines.

- 366 CU YD/HR PRODUCTION*
- REDUCED MIXING TIMES
- HIGH QUALITY CONCRETE
- CONSISTENT BATCHES
- FAST SETUP / TEARDOWN
- UNITIZED CONSTRUCTION
- DEPENDABLE OPERATION
- SUPERIOR DESIGN

The *ERIE MG-11C* excels at meeting the challenges of the toughest onsite central mix concrete projects. All difficult production schedules are consistently met with dependable high plant output. Rugged mobile units are combined with tight manufacturing specifications to ensure reliable operation for years of service. The *ERIE MG-11C* will exceed the expectations of the most demanding project supervisors.

**STANDARD CONFIGURATION**
- 12 cubic yard tilt mixer
- AR-400 abrasion resistant steel drum liner
- 50 HP Parker hydraulic tilt system
- 75 HP high torque mixer gear drives
- Mobile unitized construction
- 20 cubic yard mobile aggregate bin
- 12 yard aggregate and cement batcher
- Load cell scale systems with stainless steel summing box
- Silent rotary turbine vibrators
- Test weight hangers
- Cement bin and batcher aeration system
- 36” batch transfer conveyor
- 40 HP Dodge 615 TXT shaft mount reducer
- 715 bbl mobile 2-compartment silo
- 4” air loading pipe
- 3” Badger electronic meter with 2-stage feed
- 15 HP Ingersoll-Rand air compressor
- 4 ½ HP aeration blower
- UL / CSA certified plant motor control panels
- *ERIE Sentry* computer control system

**OPTIONAL FEATURES**
- 10 and 15 cubic yard mixer
- Erithane drum liner
- Mixer nose plug
- Concrete directional chute
- Four to eight bin compartments
- 50, 80, and 100 yard mobile aggregate bins
- 48” batch transfer conveyor
- AR-400 steel and Erithane bin and batcher liners
- 935 bbl and 1150 bbl cement silos
- Two compartment silos with double wall dividers
- Additional 4” to 5” air loading pipes
- Anti-overfill valves
- Internal silo dust duct
- Water storage tank with water pump
- Plant maintenance platforms
- Access ladders and walkways
- Automatic grease systems
- Hydrokin® Hydro-Probe II microwave moisture system
- C&W central dust collection and filter vent systems
- Bin charging conveyors
- Aggregate ground hoppers
- Automatic aggregate handling panels
- Telescopic test weight hangers
