THE COMPANY

Erie Strayer Company is headquartered in Erie, Pennsylvania.

It is a full service, single source supplier of concrete batch plant systems. The company has developed standard plant design solutions for more than 60 years.

Engineering, sales and support services are concentrated at headquarters and are complemented by support services throughout the US.

International business includes the regular supply of equipment and spare parts for projects in Africa, The Middle East, Central and Eastern Europe, Russia, South America and Asia.

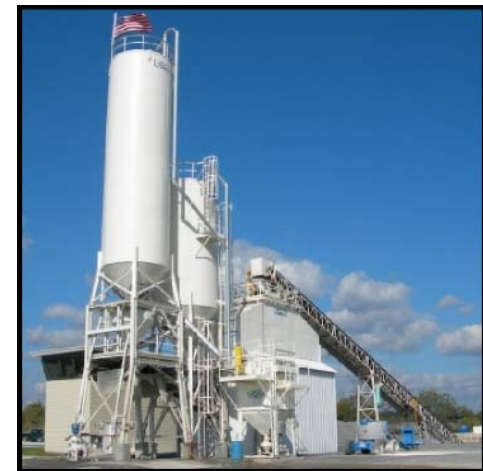

CONCRETE BATCH PLANTS

Through the use of highest quality materials and manufacturing techniques, the **ERIE** product is known worldwide for its longevity, reliability, and superior design.

All **ERIE** equipment offers robust construction and low maintenance resulting in increased profitability.

**ERIE Mobile Transit Mix (dry mix) Plants**

Mobile plants in semi-trailer configuration for concrete and construction projects in remote areas.

Output capacity : 85 - 173 m³ / hour.

**ERIE Mobile Central Mix (wet mix) Plants**

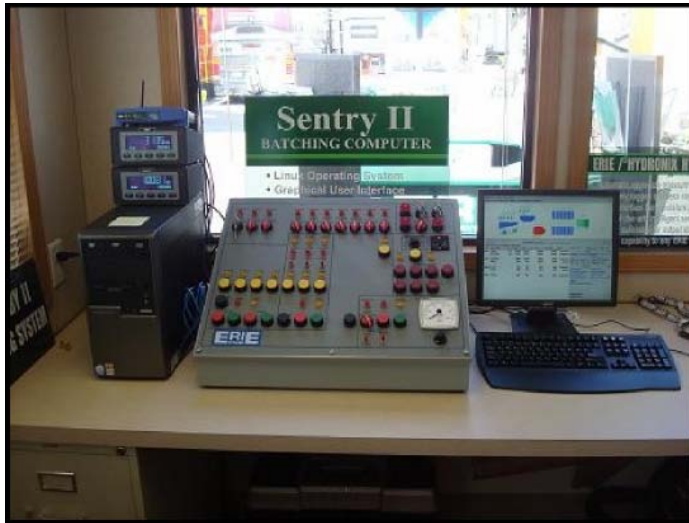

Mobile central mix plant in semi-trailer configuration for ready mix concrete, and road paving.

Output capacity : 300 m³ / hour.

BATCHING CONTROL SYSTEMS

ERIE Computer Batching Control Systems feature user friendly consoles that allow control of all plant functions.

Bin Hoppers and Charging Conveyors

ERIE offers a diverse line of conveyors and hoppers for all applications from single belt feeder conveyor to overland and tunnel systems.

TECHNICAL EXPERTISE

ERIE assists customers in plant engineering, foundation design, operations, training and logistics flow for permanent and mobile plants worldwide.

MIXING TECHNOLOGY

ERIE and leading suppliers have been closely involved in mixing technology for over 60 years and have developed the most productive and cost effective concrete mixing solutions to serve project construction, ready mix and road building industries. Plant components are designed in the most efficient configurations to allow reduced transport costs and rapid start-up.

Plant Installation

Qualified technicians are available for plant erecting and start-up operations.

Spare Parts

Fast moving critical parts that are available in stock are: air cylinders, solenoids, vibrators, butterfly valves, bearings, air pads, rollers, bin indicators, mixer gears, etc...

Used Equipment

ERIE inventories and sources quality reconditioned plant and mobile equipment. We inspect and appraise the equipment prior to purchase.

Financing

ERIE offers customers financing possibilities for new plant facilities.

International References

ERIE supplies concrete batch plants and related equipment globally. We are proud to have the following customers:

Bechtel

Fluor

ABB Susa

Willbro s

Enka

Aramco

Zachary

KBR
